JAVA COURSE

EXERCISE

INSTALLING NETBEANS IDE ON WINDOWS

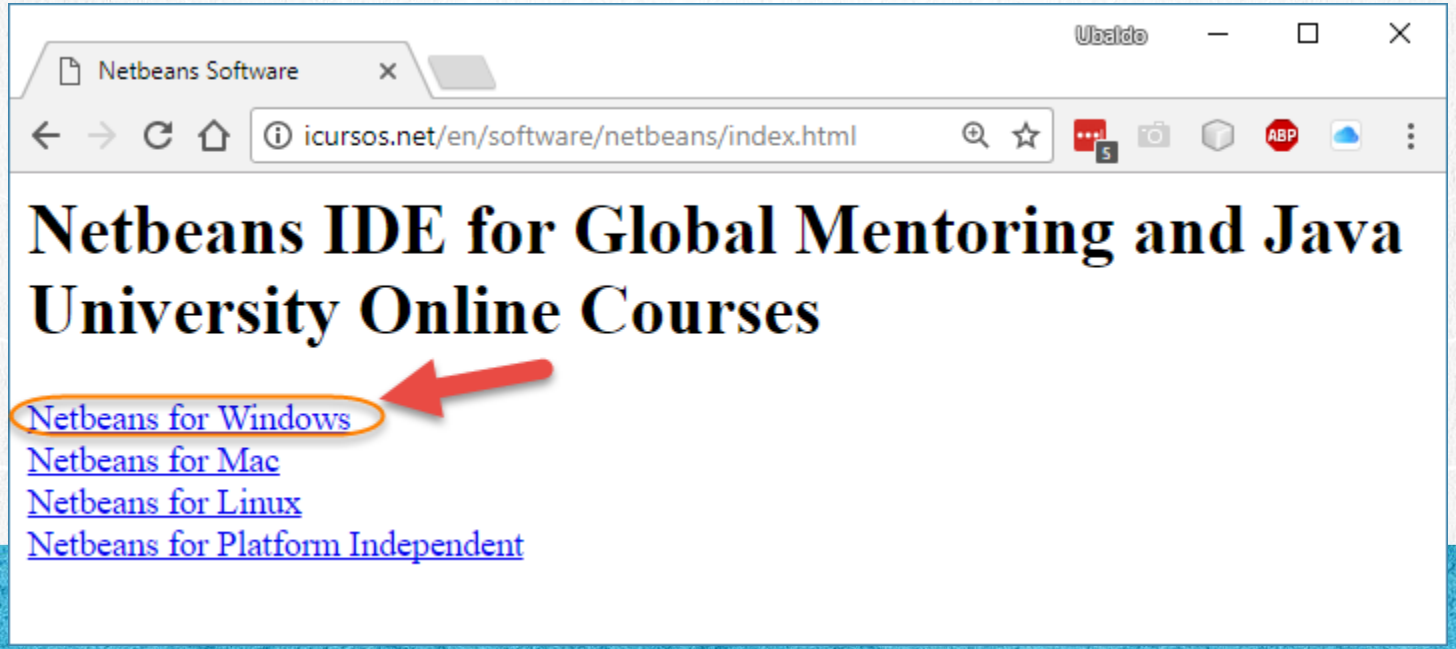
Experiencia y Conocimiento para tu vida

EXERCISE OBJECTIVE

In this exercise we will proceed to install the Integrated Development Environment (IDE) of Netbeans. We will cover the process of downloading and installing Netbeans.

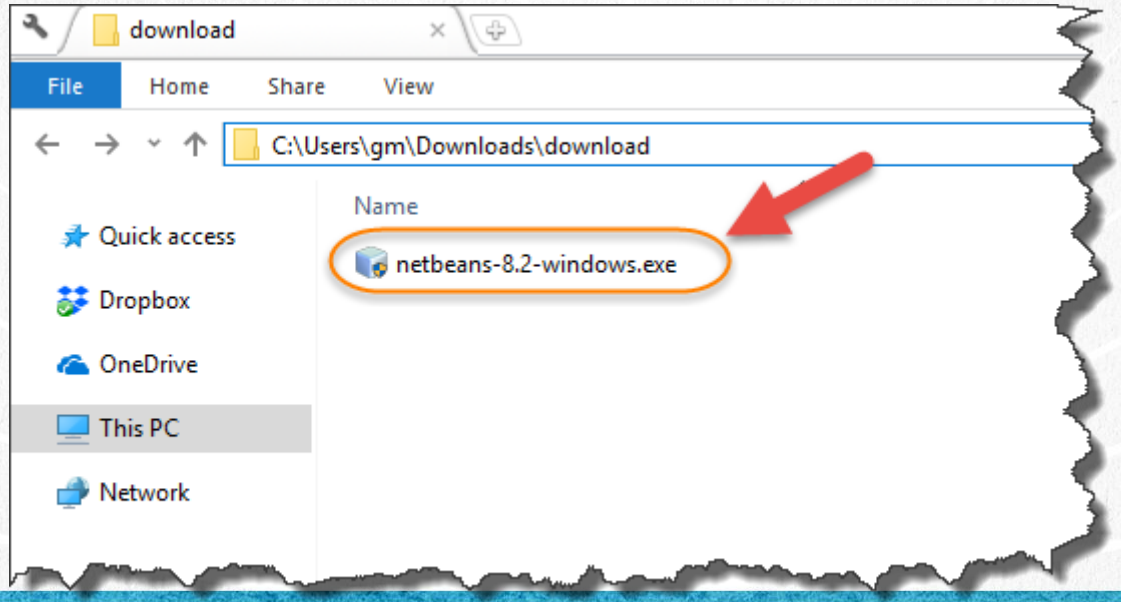
STEP 1. DOWNLOAD THE NETBEANS IDE

Go to: http://icursos.net/en/software/netbeans/index.html and download Netbeans, select the platform you use. In this case we select Netbeans for Windows option:



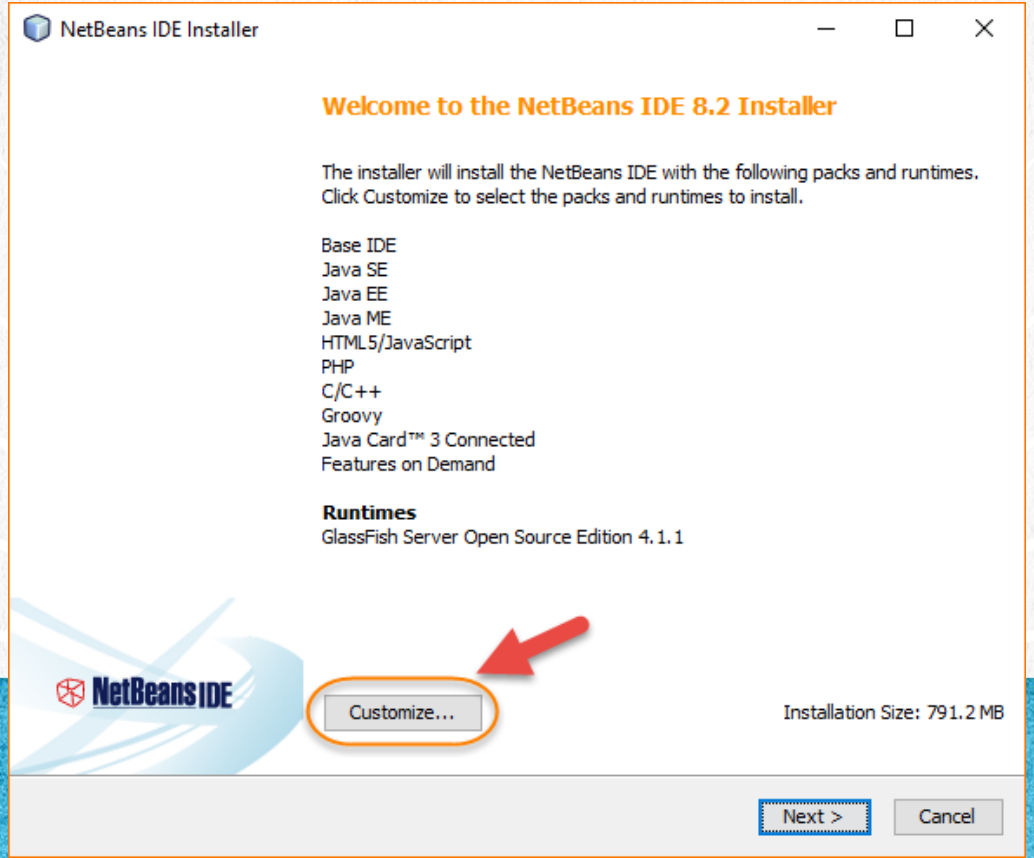
STEP 2. INSTALLING NETBEANS IDE

Once the file is downloaded, we double click to open the installer:



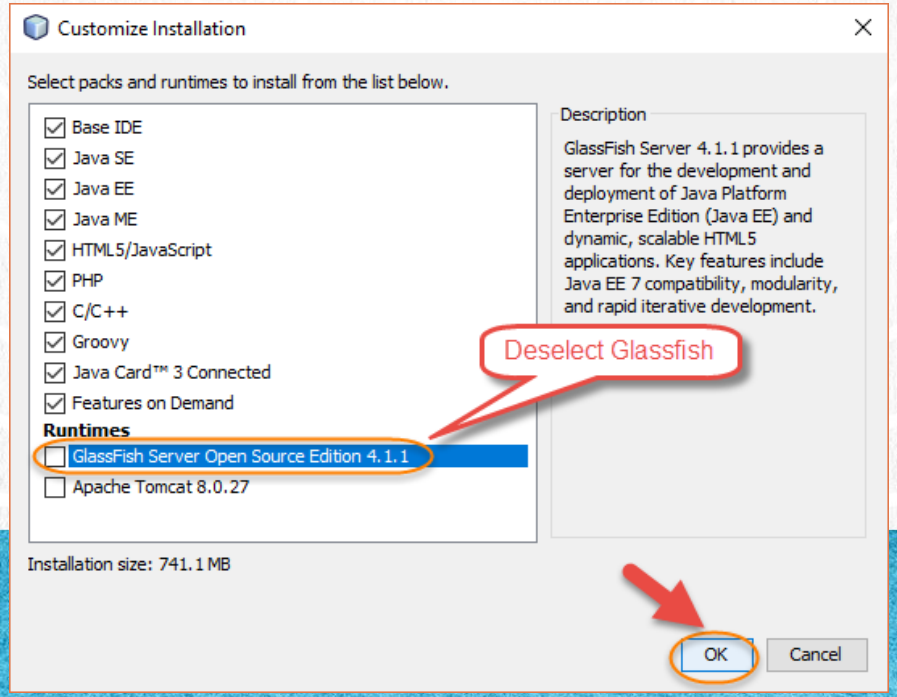
STEP 2. INSTALLING NETBEANS IDE

Before we install the IDE, we can customize it. We click on Customize:



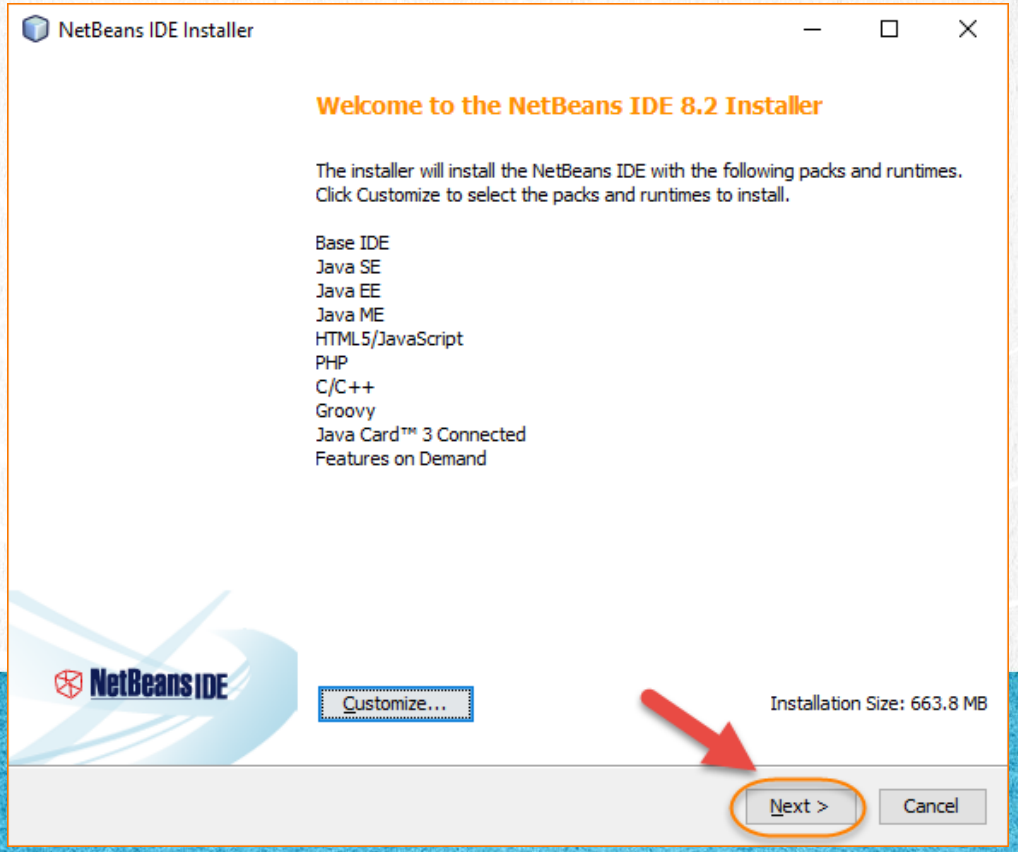
STEP 2. INSTALLING NETBEANS IDE

Deselect Glassfish Server and click Ok, this is because we will install a newer version of this Java Application Server. If you don't know what an application server is, don't worry, we'll cover it later in the course:



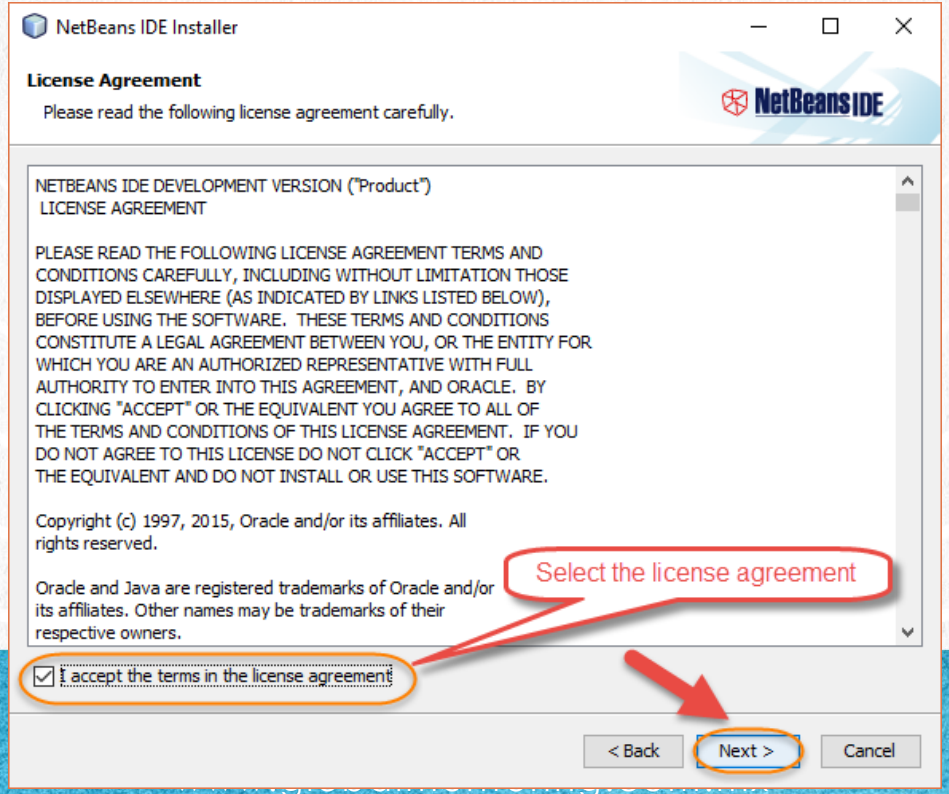
STEP 2. INSTALLING NETBEANS IDE

Once we have finished customizing the installation, click on Next to continue:



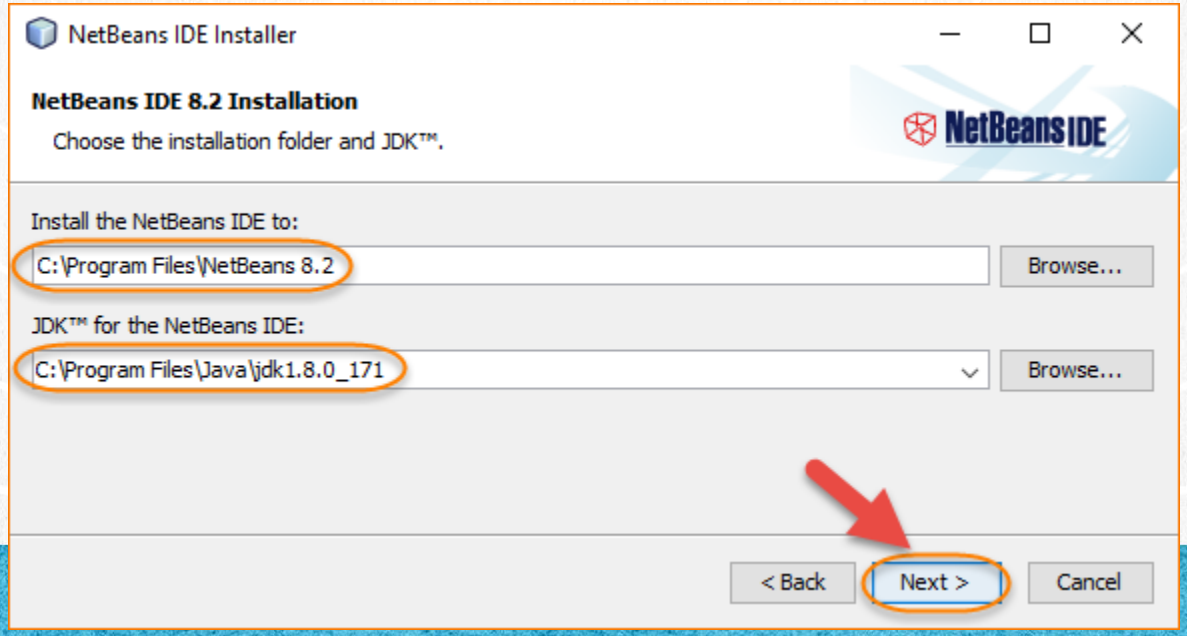
STEP 2. INSTALLING NETBEANS IDE

Accept the license agreement, and click on Next:



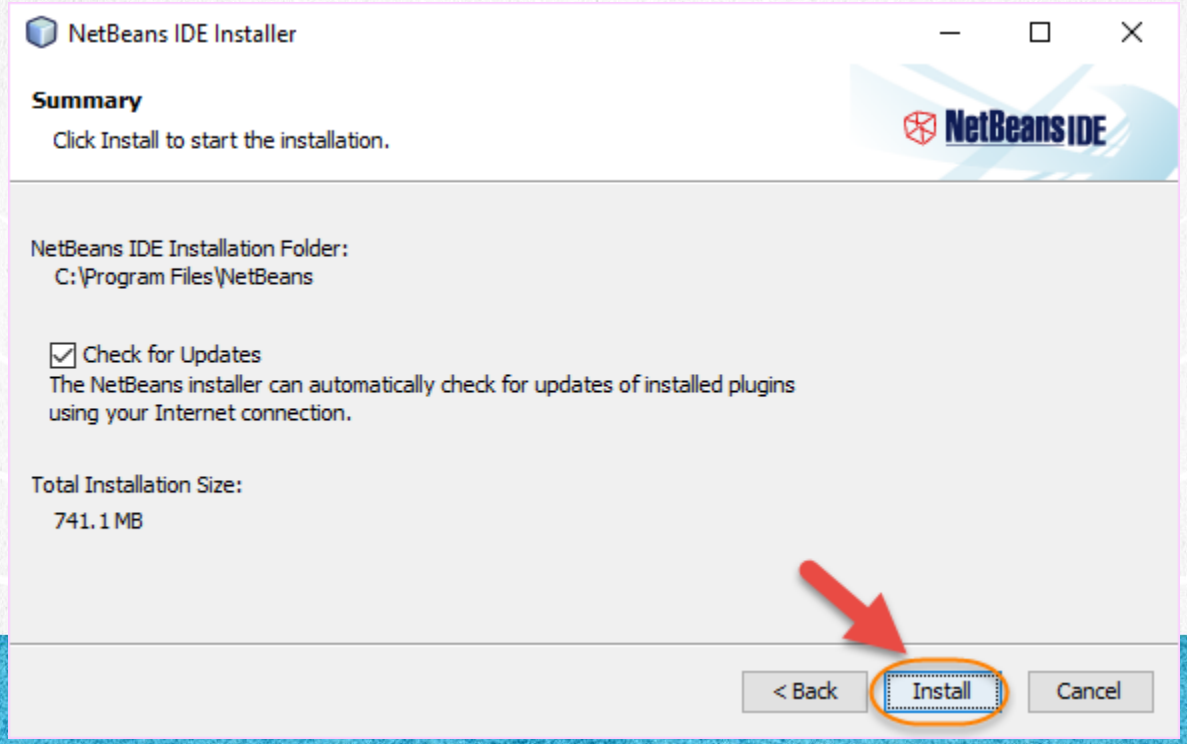
STEP 2. INSTALLING NETBEANS IDE

Rename the installation path of Netbeans as show below. The JDK path is selected automatically, and click on next:



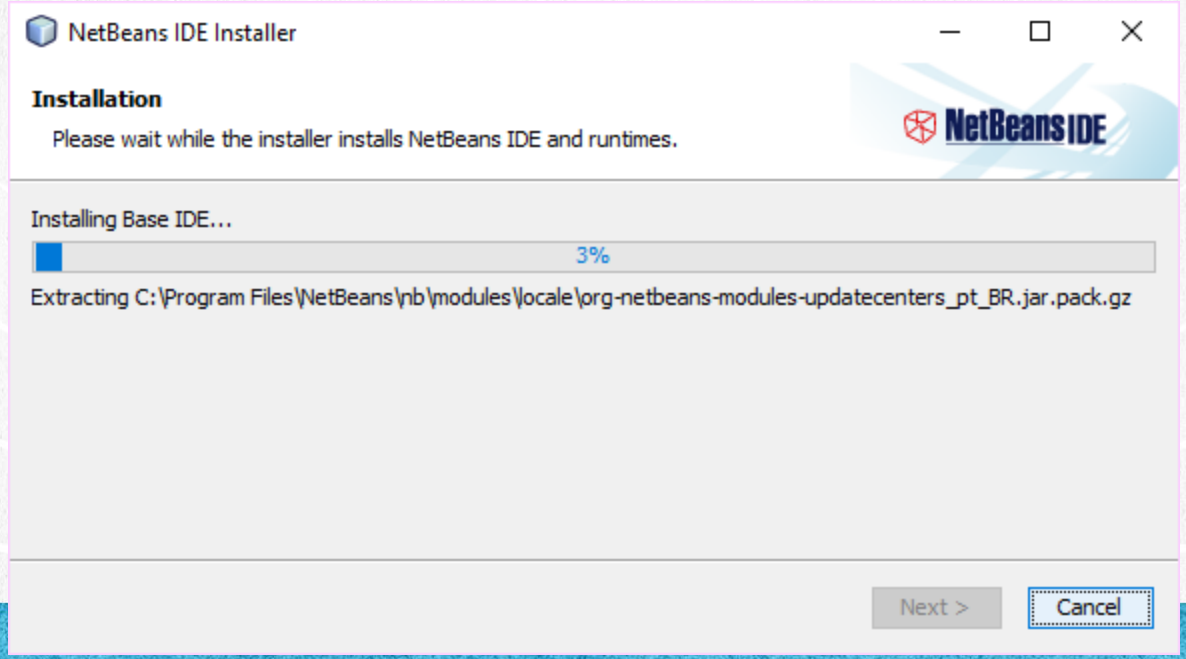
STEP 2. INSTALLING NETBEANS IDE

Accept the default values, and click on Install:



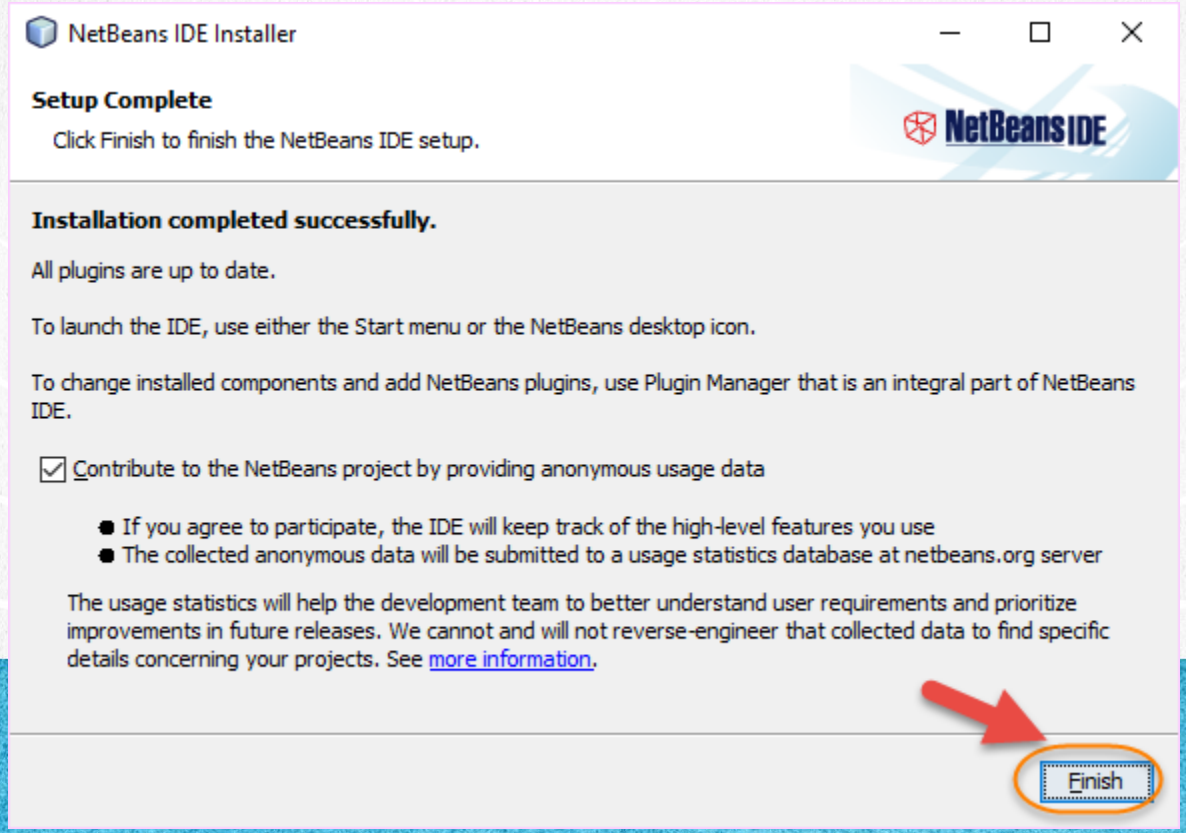
STEP 2. INSTALLING NETBEANS IDE

The installation process starts, and it takes a few minutes to finish.



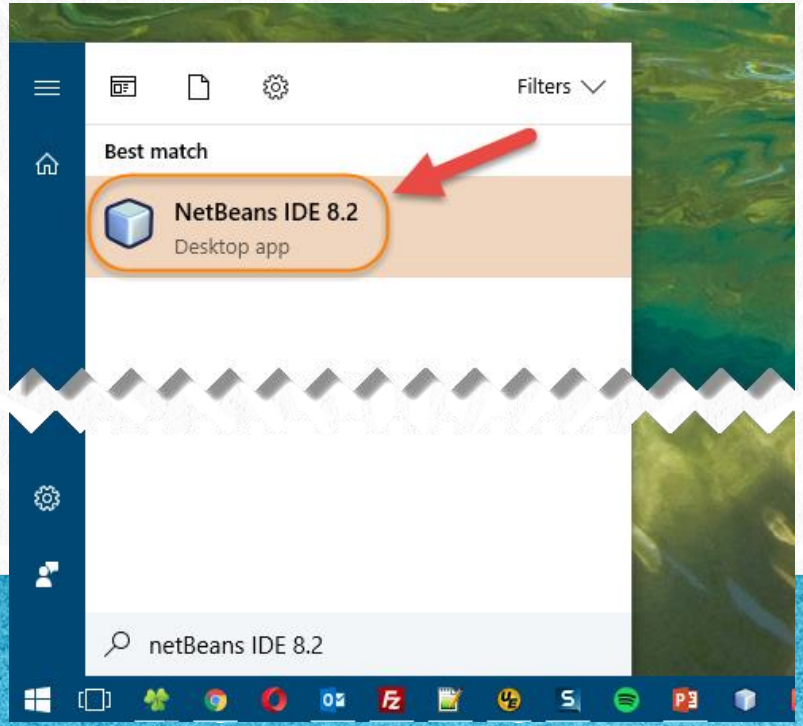
STEP 2. INSTALLING NETBEANS IDE

The installation ends and click on Finish:



STEP 2. OPEN THE NETBEANS IDE

Go to programs to open Netbeans. We search for Netbeans IDE 8.2:

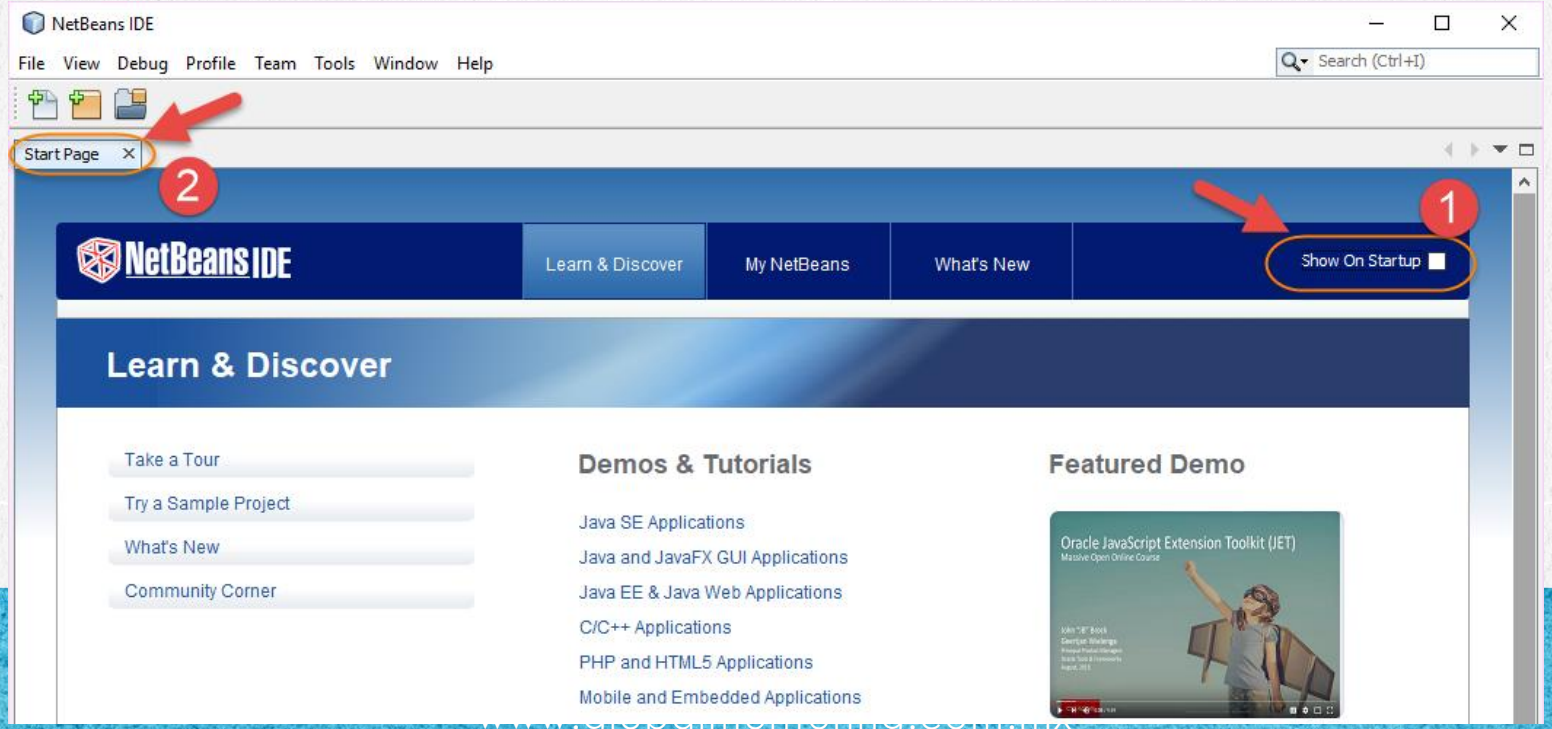


STEP 2. OPEN THE NETBEANS IDE

The Netbeans IDE starts:

STEP 2. OPEN THE NETBEANS IDE

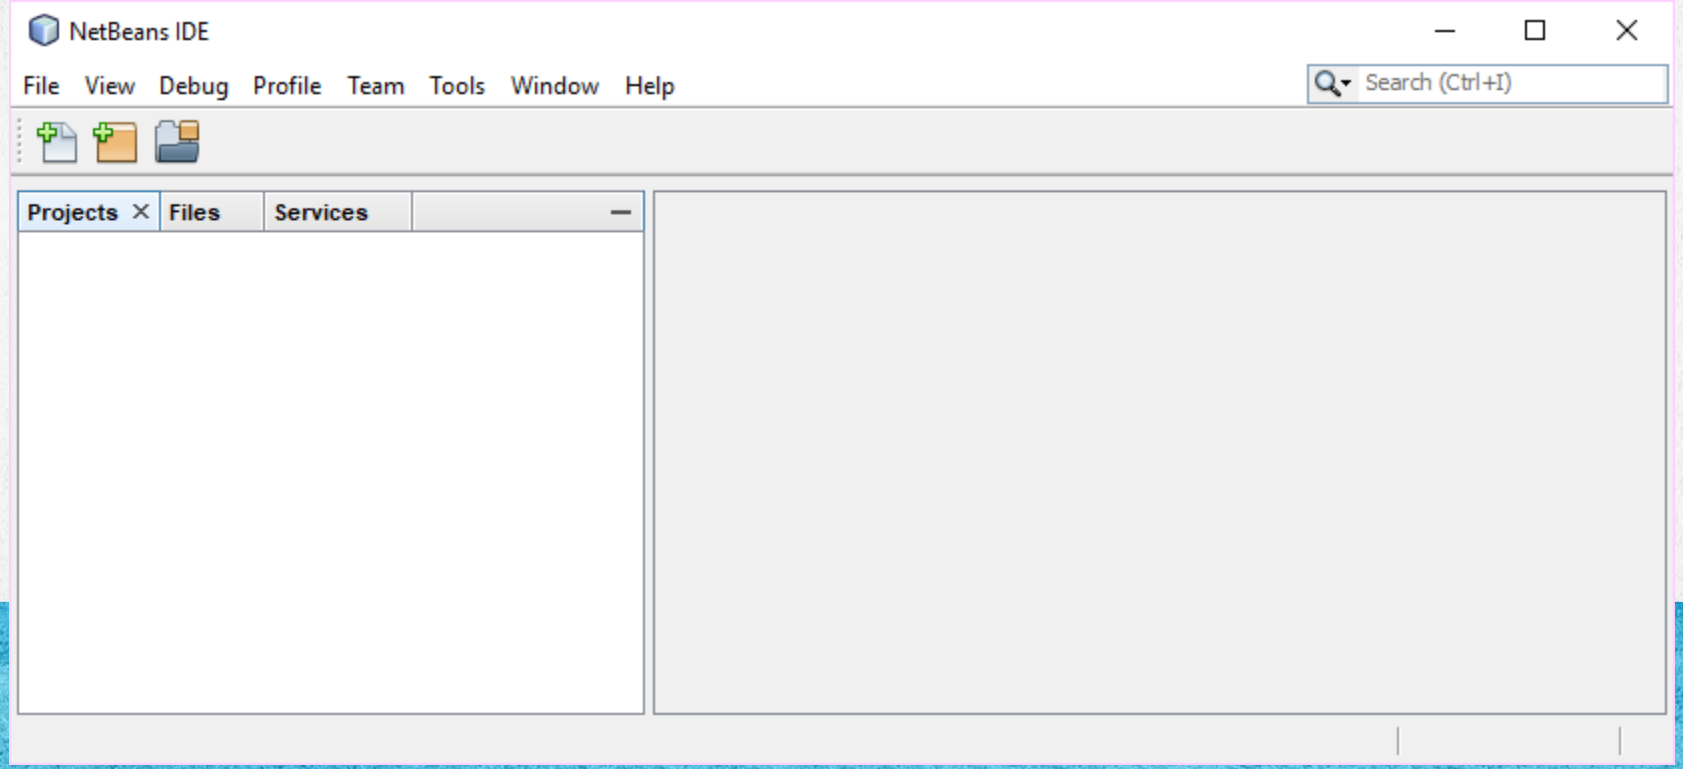
The Start Page shows up. You can deselect on Show on Startup, and close the Start Page:



www.globalmentoring.com.mx

STEP 2. OPEN THE NETBEANS IDE

Finally, the Netbeans IDE is ready to use. We finished the installation process.



EXERCISE CONCLUSION

- With this exercise we have installed the tools that we will use throughout the course.
- It is worth mentioning that it is possible to use even a Notepad, however the idea is to use real-world tools, and with more experience you can select the development tool (IDE-Integrated Development Environment) that suits you best ☺
- For more details of Netbeans, you can check the next link:
- https://netbeans.org/kb/index.html
