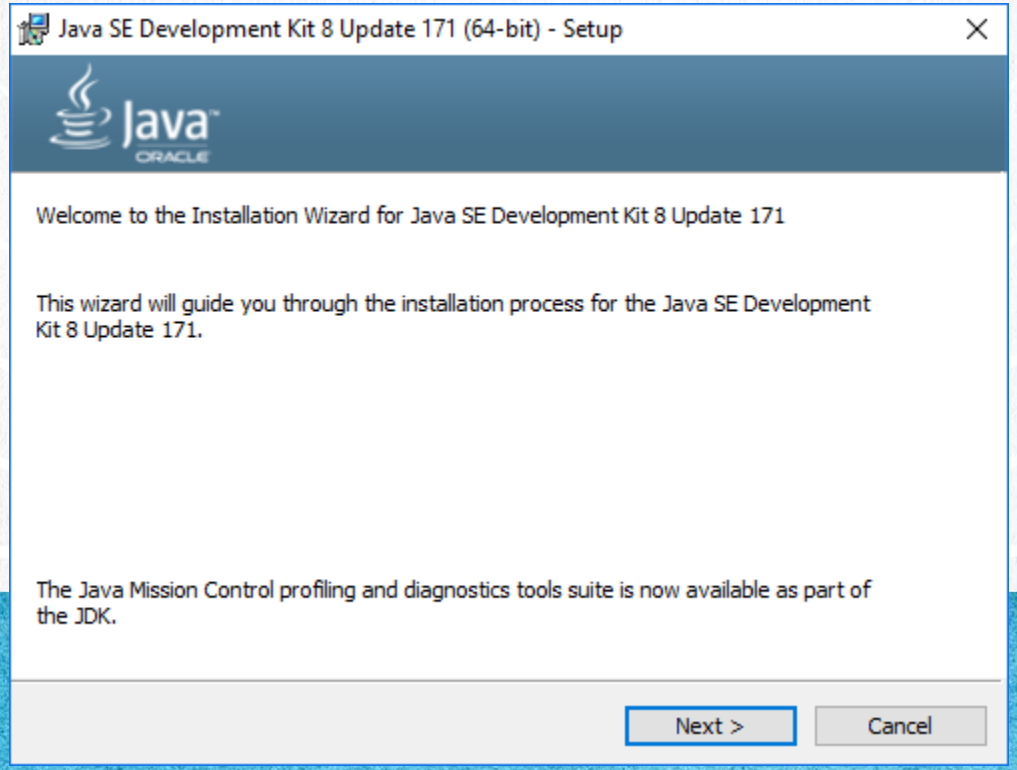
JAVA COURSE

EXERCISE

INSTALLING THE JDK ON WINDOWS

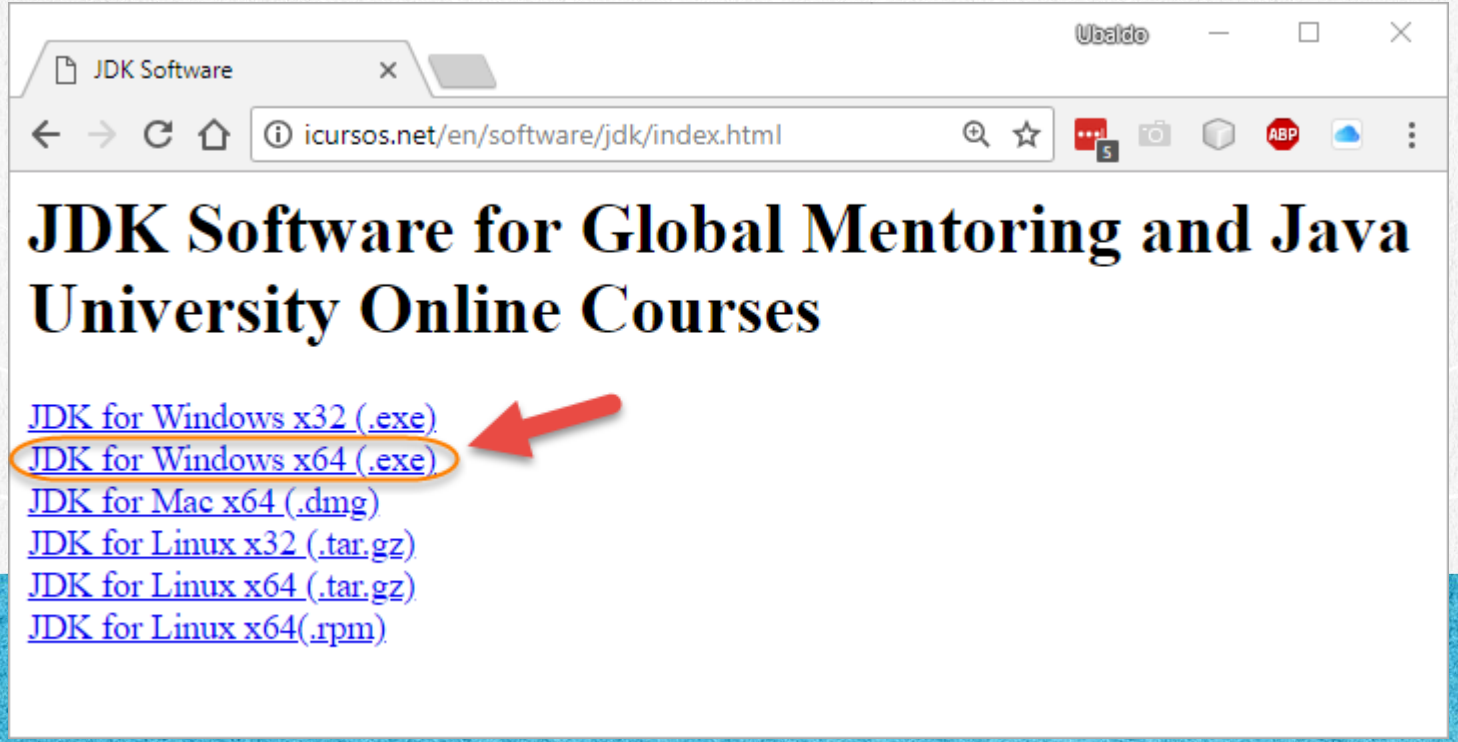
EXERCISE OBJECTIVE

In this exercise we will proceed to install the Java Development Kit. We will cover the process of downloading and installing the JDK.



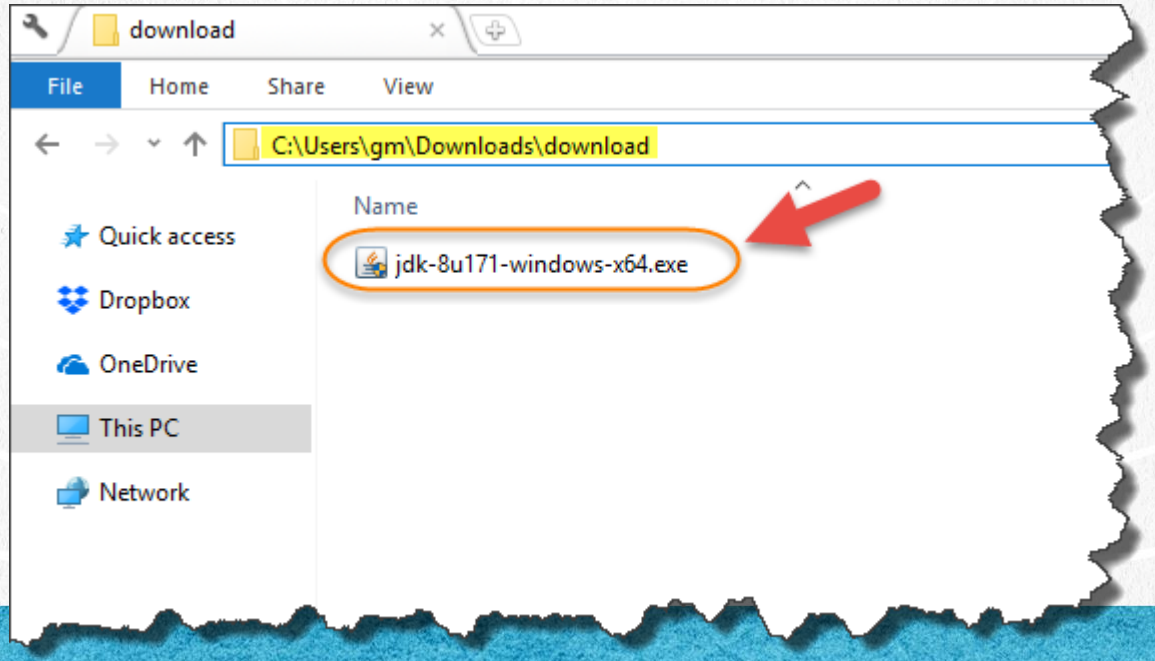
STEP 1. DOWNLOAD THE JDK

Go to: http://icursos.net/en/software/jdk/and download the JDK. Select the platform you correspond to the operating system that you use. In this case we select the Windows x64 option:



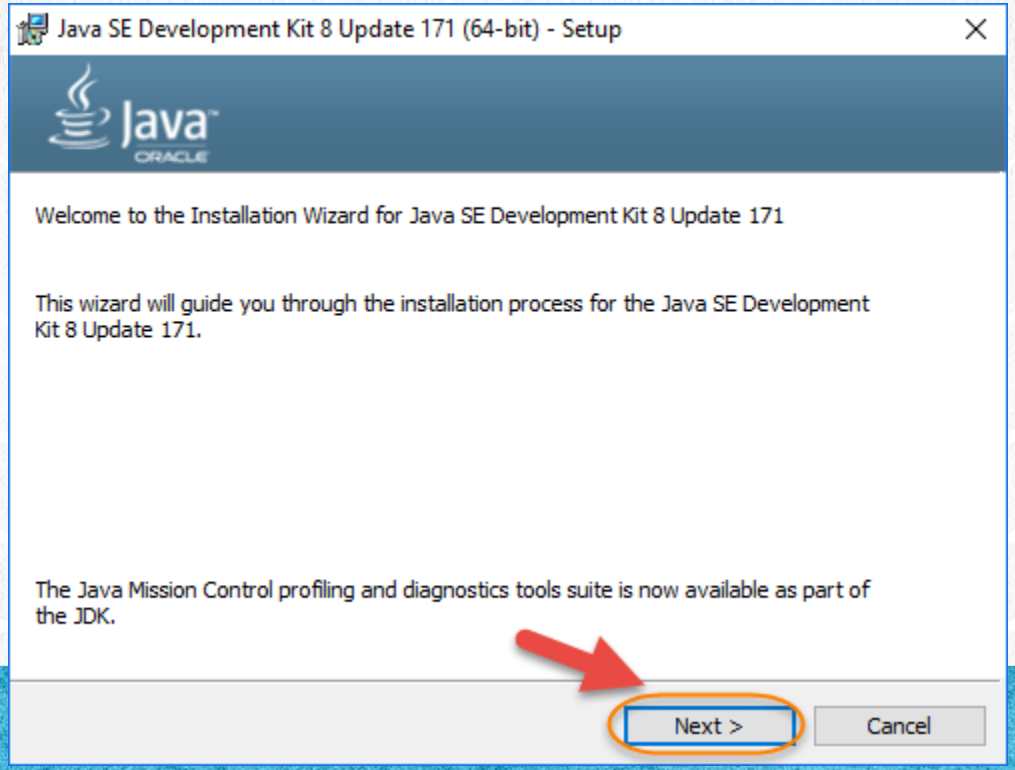
STEP 2. INSTALLING THE JDK

Once the file is downloaded, we double click to open the installer:



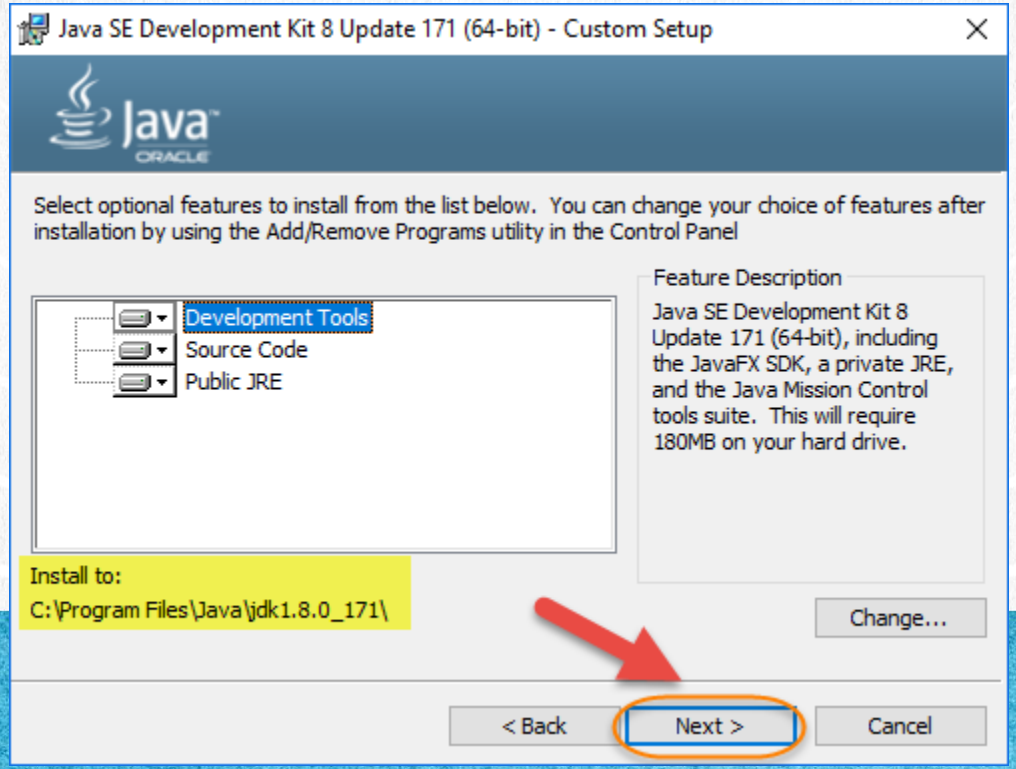
STEP 2. INSTALLING THE JDK

The installer opens and click on next:



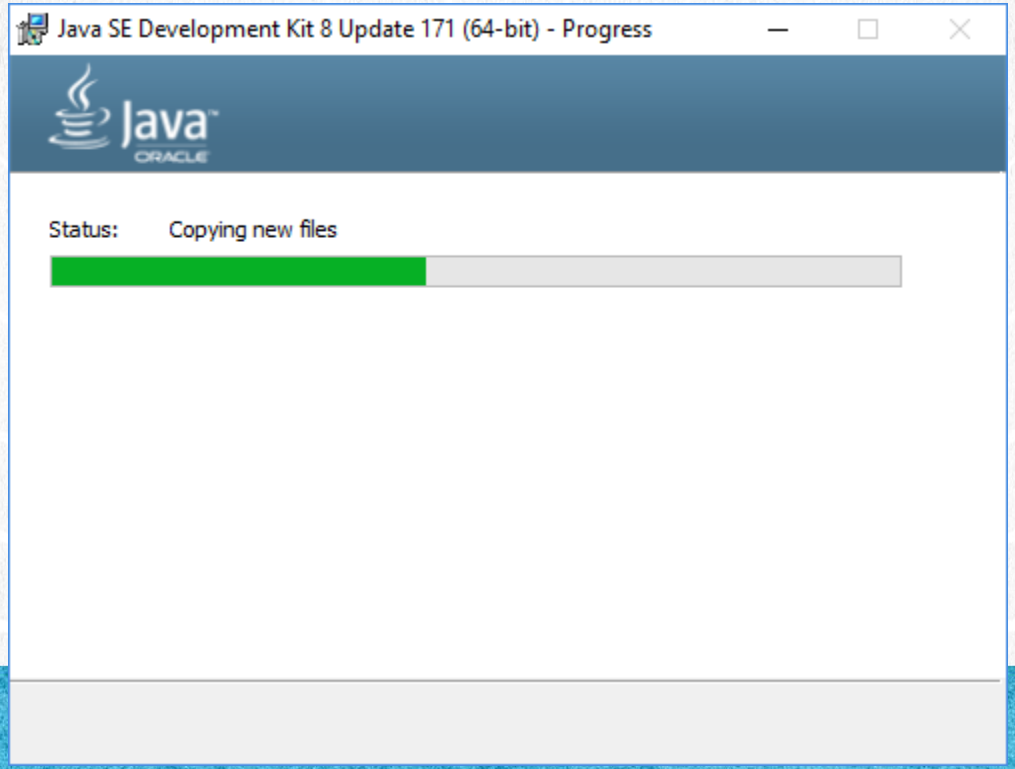
STEP 2. INSTALLING THE JDK (CONT)

- Next, we see the installation path of the JDK. Here, you can modify it, but we leave the default values and click on next:



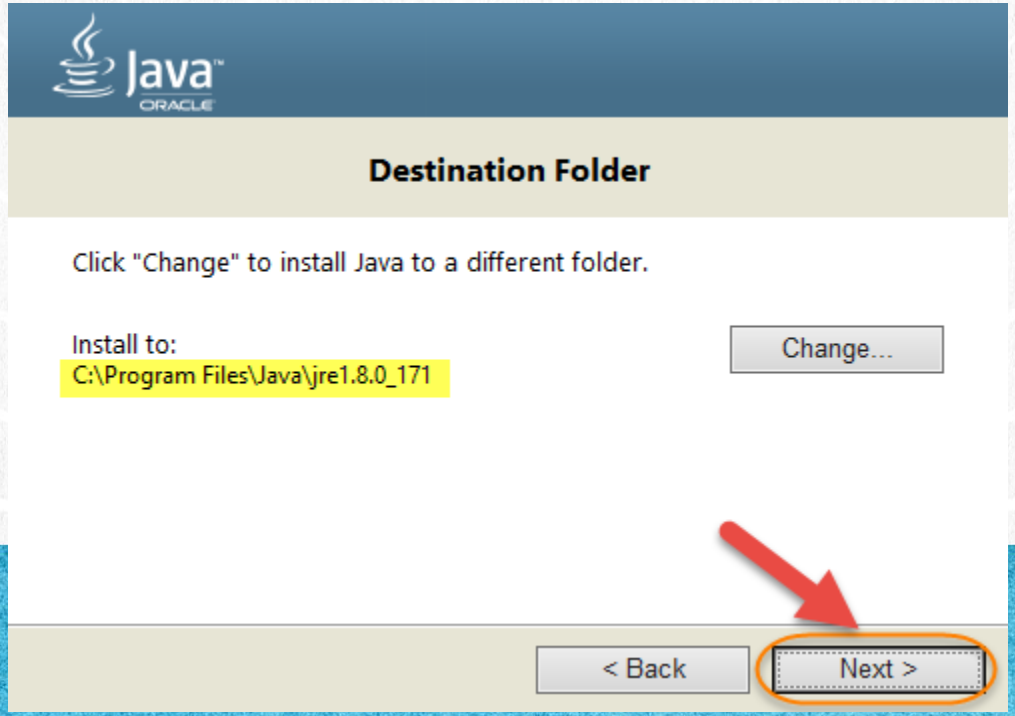
STEP 2. INSTALLING THE JDK (CONT)

- We wait for the installation to finish:



STEP 3. INSTALLING THE JRE

- As part of the Java JDK (Java Development Kit) installation, the JRE (Java Runtime Environment) will be installed too. Here, you can change the installation path. We will leave the default values:



STEP 3. INSTALLING THE JRE

- We wait for the JRE installation to finish:

STEP 3. INSTALLING THE JRE

- Click on Close. We conclude the installation of Java JDK and JRE:

EXERCISE CONCLUSION

- In this exercise we have installed the JDK and the JRE in order to use the Java language in our computer.

- For more details of Java installation on other platforms, you can check the next link:
