```
<!DOCTYPE html>
<html>
   <head>
      <meta charset="UTF-8">
      <title>CSS Example 1</title>
   </head>
   <body  style="background:#ffffcc; color:#551100;font-family:Comic Sans MS;">
      <h1>CSS Example 1</h1>
      <p style="font-family:Arial Black;">
         This is the content of the <span style="font-size:xx-large;">paragraph</span> 1
      </p>
      <br>
      <p style="color:#ff0000;">
         This is the content of paragraph 2
      </p>
      <br>
      <p style="color:#f8d077">
         This is the content of paragraph 3
      </p>
   </body>
</html>
```

3. EXECUTE THE PROJECT

The result is as follows:

EXERCISE CONCLUSION

- With this exercise we have put into practice the basics of CSS styles, defining the styles directly on the style attribute of the selected HTML elements.

- We will see more examples of how to improve the style application to our HTML elements.
