

## SERVLETS AND JSP COURSE

# FINAL LAB USER CATALOG

Por el experto: Ing. Ubaldo Acosta

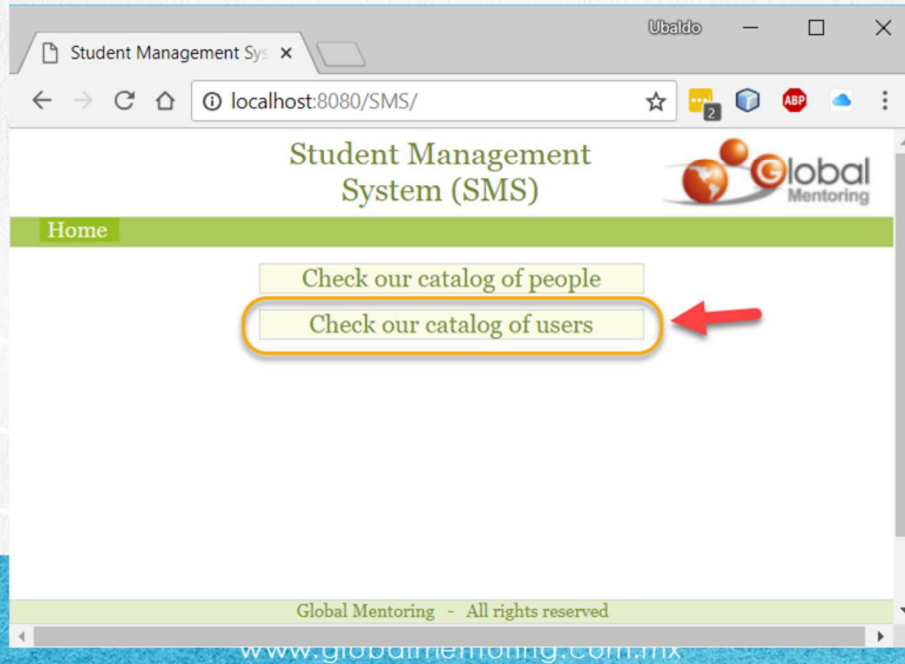

[www.globalmentoring.com.mx](http://www.globalmentoring.com.mx)

Hello, Ubaldo Acosta greets you again.

Since we have deployed the SMS system, the student is now requested to create the User use case, let's see what is requested.

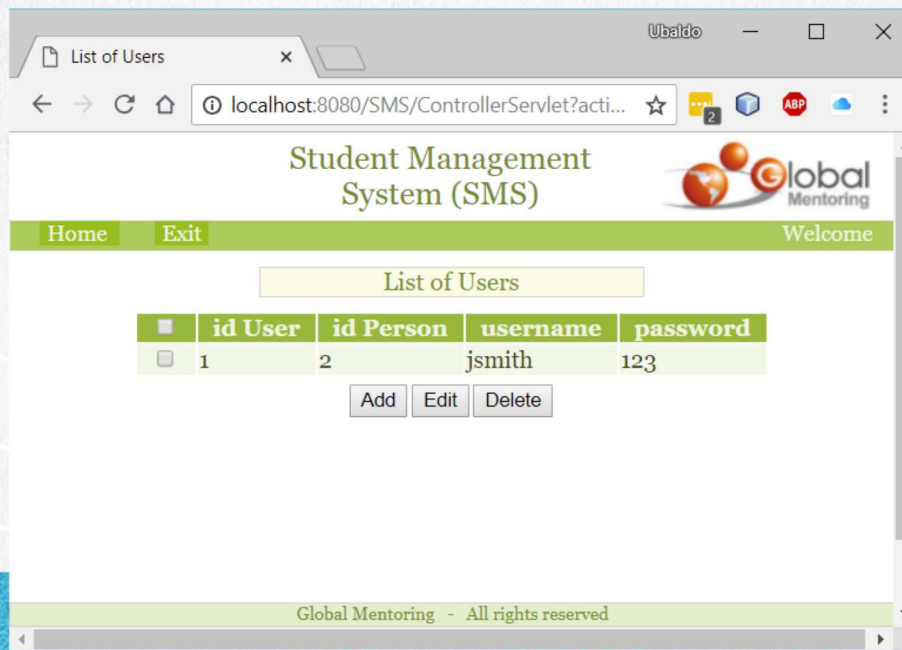

Are you ready? Come on!

## ACTIONS TO BE MADE

Se debe agregar la opción de catálogo de Usuarios y también validarse por medio del login de la aplicación.

## ACTIONS TO BE MADE

The actions of Listing, Adding, Editing and Deleting users must be added. You can rely on the list of people that is already made for the realization of this actions.

## CONCLUSION OF THE PROJECT

- **CONCLUSION OF THE PROJECT AND THE COURSE**

- The registration, modification and removal of the list of users must be completed.
- With this system we saw how to implement a 3-layer architecture, using several design patterns, such as MVC, DTO, DAO, among others.
- We also put into practice everything seen from the courses on Java Basics, Java Programming, Java with JDBC, HTML / CSS / JavaScript, as well as integrating all the topics seen in this course of Servlets and JSPs.
- So with this architecture you are ready to understand, analyze, design and develop Web applications with Java using Servlets and JSPs, among several other technologies.
- We wait for you in the next course of Global Mentoring, where you will continue deepening in this exciting world of programming with Java. See you soon!
