# HANDLING USERS WITH JDBC

**JAVA WITH JDBC**

[www.globalmentoring.com.mx](http://www.globalmentoring.com.mx)

# JDBC EXERCISE

It is requested to create a Java project with the following characteristics:

Create a table called user in mysql in the schema: test

id\_user (int) (Primary Key)

user (varchar)

password (varchar)

Create the classes similar to the Handling JDBC with the Person table, but in this case for handling the operations SELECT, INSERT, UPDATE, DELETE for the user table.
