POSSIBLE PROBLEMS WHEN EXECUTING THE PROJECT

Only in case of error when compiling the project, you can try to clear the Netbeans cache, to find the next cache path on your PC depending on the operating system you have. To see the Netbeans cache path, open Netbeans, go to Help -> About:

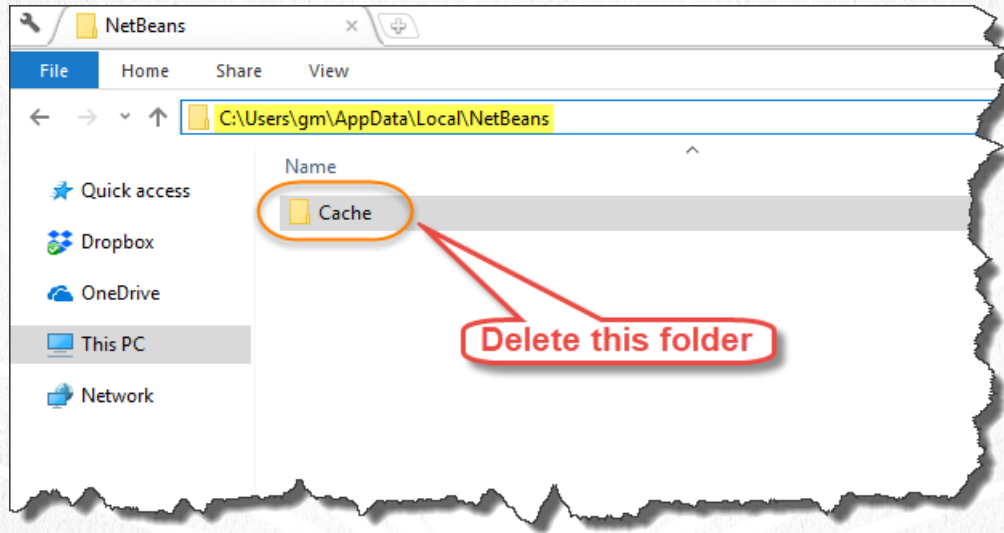

POSSIBLE PROBLEMS WHEN EXECUTING THE PROJECT

This shows us the **cache path** according to the operating system that we have:

POSIBLES PROBLEMAS AL EJECUTAR EL PROYECTO

Once the path is found, delete the cache folder. Close and re-open Netbeans, and try to compile the project again.

If it does not work, uninstall and reinstall Netbeans again.
